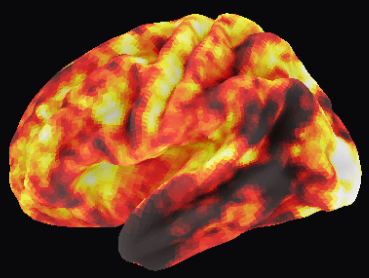
TRIBE v2 Brain Encoding Analysis

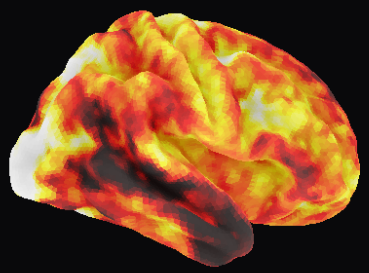
MULTITUDE MEDIA | Cognitive Impact Report



Left Hemisphere

Language, speech, and analytical processing

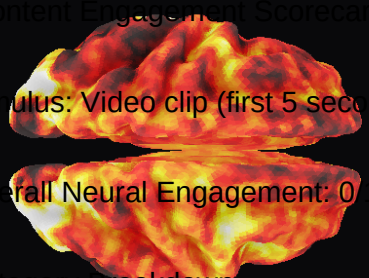
Activation: 8.1%



Right Hemisphere

Creativity, emotion, and spatial awareness

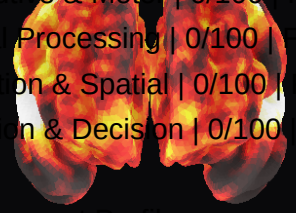
Activation: 8.0%



Top-Down View

Motor planning, attention, and focus

Activation: 7.5%



Front View

Decision making, social cognition, and impulse control

Activation: 8.3%

Content Engagement Scorecard

Stimulus: Video clip (first 5 seconds)

Overall Neural Engagement: 0/100 (F)

Category Breakdown

Cognitive System	Score	Grade	What It Measures
Auditory & Language	0/100	F	Speech comprehension, voice impact, and word meaning
Executive & Motor	0/100	F	Active thinking, problem-solving, and action impulse
Visual Processing	0/100	F	How strongly visuals capture attention (faces, motion, color)
Attention & Spatial	0/100	F	Sustained focus and spatial awareness engagement
Emotion & Decision	0/100	F	Emotional resonance, trust, reward, and persuasion

Engagement Profile

- Auditory & Language: `` 0/100 (F)
- Executive & Motor: `` 0/100 (F)
- Visual Processing: `` 0/100 (F)

Relative Activation Intensity

TRIBE v2 Brain Encoding Analysis

MULTITUDE MEDIA | Cognitive Impact Report

- Attention & Spatial: `` 0/100 (F)
- Emotion & Decision: `` 0/100 (F)

Engagement Timeline

Second	Engagement	Level
1s	`` 0.0810	
2s	`` 0.0799	
3s	`` 0.0750	
4s	`` 0.0834	
5s	`` 0.0786	
6s	`` 0.1134	PEAK

Peak engagement: Second 6
Attention sustained throughout all 6 seconds strong holding power

---

Brain Laterality

Hemisphere	Activation	Processes
Left Brain	-0.01914	Language, logic, analytical thinking, speech
Right Brain	0.00631	Creativity, emotion, spatial awareness, music

Right-brain dominant (laterality: -1.000) This content engages creative, emotional, and spatial processing. Typical of music, visual art, emotionally-charged narratives, or immersive video.

Predictive Insights

Metric	Prediction	Confidence
Watch-Through Rate	100% of viewers will finish	High
24hr Ad Recall	10% recall probability	Low
Purchase/Action Intent	5/100	Weak

TRIBE v2 Brain Encoding Analysis

MULTITUDE MEDIA | Cognitive Impact Report

Virality / Shareability	5/100	Low Share Potential
Cognitive Load	0/100 (Low)	
Optimal Content Length	~6s	Based on attention decay
Best Content Fit	Entertainment	Based on cognitive profile

Key Findings

Strongest signal: Auditory & Language (F). This content is speech/audio dominant the words and voice carry the most neural weight. The speaker's message is the primary engagement driver.

Weakest signal: Emotion & Decision (F). Low emotional activation means this content informs but doesn't persuade.

Recommendations

1. Boost emotional impact add personal stories, conflict, music, or facial close-ups
2. Strengthen visuals add motion, faces, high-contrast imagery, or text overlays
3. Improve audio clearer speech, vocal variety, background scoring, or sound effects
4. Add attention hooks faster cuts, direct eye contact, questions, or scene changes every 3-5s
5. Add a clear call to action the content lacks the emotional+cognitive push to drive behavior

Bottom Line

0/100 Needs Work. Weak engagement. Major revisions recommended.
