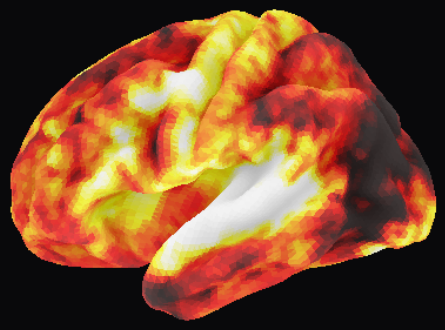
TRIBE v2 Brain Encoding Analysis

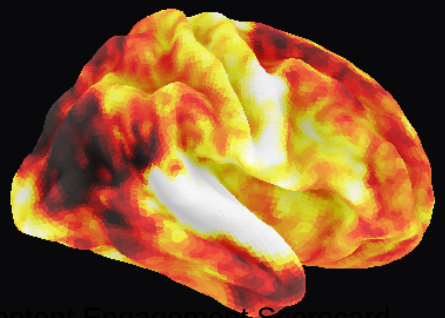
MULTITUDE MEDIA | Cognitive Impact Report



Left Hemisphere

Language, speech, and analytical processing

Activation: 10.6%



Right Hemisphere

Creativity, emotion, and spatial awareness

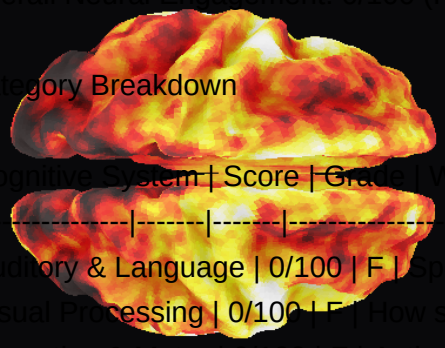
Activation: 10.2%

Content Engagement Scorecard

Stimulus: Video clip (first 3 seconds)

Overall Neural Engagement: 0/100 (F)

Category Breakdown



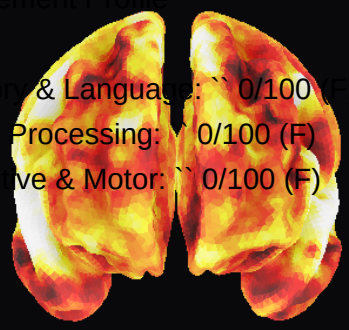
Top-Down View

Motor planning, attention, and focus

Activation: 10.0%

Cognitive System	Score	Grade	What It Measures
Auditory & Language	0/100	F	Speech comprehension, voice impact, and word meaning
Visual Processing	0/100	F	How strongly visuals capture attention (faces, motion, color)
Executive & Motor	0/100	F	Active thinking, problem-solving, and action impulse
Attention & Spatial	0/100	F	Sustained focus and spatial awareness engagement
Emotion & Decision	0/100	F	Emotional resonance, trust, reward, and persuasion

Engagement Profile



- Auditory & Language: `` 0/100 (F)
- Visual Processing: `` 0/100 (F)
- Executive & Motor: `` 0/100 (F)

Front View

Decision-making, social cognition, and impulse control

Activation: 8.0%

- Emotion & Decision: `` 0/100 (F)

Engagement Timeline

Second	Engagement	Level
1s	`` 0.1063	PEAK
2s	`` 0.1021	
3s	`` 0.1004	
4s	`` 0.0795	
5s	`` 0.0756	
6s	`` 0.1016	

Peak engagement: Second 1
Attention sustained throughout all 6 seconds strong holding power

---

Brain Laterality

Hemisphere	Activation	Processes
Left Brain	-0.02446	Language, logic, analytical thinking, speech
Right Brain	-0.00609	Creativity, emotion, spatial awareness, music

Right-brain dominant (laterality: -0.601) This content engages creative, emotional, and spatial processing. Typical of music, visual art, emotionally-charged narratives, or immersive video.

Predictive Insights

Metric	Prediction	Confidence
Watch-Through Rate	86% of viewers will finish	High
24hr Ad Recall	10% recall probability	Low
Purchase/Action Intent	5/100	Weak

TRIBE v2 Brain Encoding Analysis

MULTITUDE MEDIA | Cognitive Impact Report

Virality / Shareability	5/100	Low Share Potential
Cognitive Load	0/100 (Low)	
Optimal Content Length	~6s	Based on attention decay
Best Content Fit	Entertainment	Based on cognitive profile

Key Findings

Strongest signal: Auditory & Language (F). This content is speech/audio dominant the words and voice carry the most neural weight. The speaker's message is the primary engagement driver.

Weakest signal: Emotion & Decision (F). Low emotional activation means this content informs but doesn't persuade.

AI Strategic Action Plan

Based on your neural encoding profile, here is exactly how to optimize this content for higher engagement:

1. Elevate Emotional Resonance: Your emotional activation is lagging. Introduce a human element earlier (faces, eyes), raise the stakes with a clear conflict or problem-statement, and consider using a subtle background music track that swells during key points.

2. Stimulate the Visual Cortex: The brain is not actively tracking your visuals. Break visual monotony by changing camera angles every 3-5 seconds, adding dynamic text overlays (B-roll, captions), or ensuring high color contrast in your framing.

3. Enhance Auditory Processing: The auditory cortex is under-stimulated. Use vocal intonation and pacing shifts to emphasize important words. Eliminate background noise and consider subtle sound effects (whooshes, pops) during visual transitions.

4. Command Focused Attention: Viewers are passively watching. Force active attention by breaking the fourth wall (direct eye contact), asking a rhetorical question, or using a 'pattern interrupt' (a sudden visual/audio shift) in the first 3 seconds.

5. Trigger Deep Thinking: The content is being consumed too passively. Challenge the viewer's assumptions, present a surprising statistic, or frame your message as a 'secret' or 'counter-intuitive truth' to force the executive network to engage.

6. Drive Action Intent: To push the brain from 'watching' to 'acting', you must explicitly state what the user

should do next. Pair a clear, urgent Call-To-Action (CTA) with a visual of the desired outcome.

7. Engineer Shareability: To make this spread organically, it needs a higher 'Social Currency' trigger. Frame the core message as something the viewer would look smart for sharing with a friend.

Bottom Line

0/100 Needs Work. Weak engagement. Major revisions recommended.
